

# CONSULTING ENGINEER – HEAD OF OFFICE

## THE COMPANY

Empire Engineering is a Bristol based company providing specialist consulting engineering services to the renewable energy sector. We are actively working in the offshore wind industry and are presently looking to expand by opening new offices in London and Edinburgh. This will allow us to better serve our existing Clients as well as develop new business.

As a company we aim to provide the very best technical expertise to our Clients, and provide a stimulating and enjoyable working environment to our staff. We have established a company culture based on striving for technical excellence, providing exceptional customer service, and enjoying what we do along the way.

We are a small and growing private company, run by engineers. We choose to work within renewable energy because of the technical challenges it presents to us as engineers, and the benefits it offers to humankind.

## THE ROLE

You will be tasked with establishing and growing a small consultancy office in **Edinburgh** or **London**. As a leader within our growing engineering consultancy, you will be involved with both business development and strategy, as well as performing day-to-day work for our Clients.

You will be an experienced senior individual with skills that will complement our existing services offering of package management, engineering management, and detailed analysis and design in the offshore wind sector. We are particularly interested in individuals with Owner's Engineer, Package Management, Engineering Management or Contract Management experience.

You will have an excellent network within the renewable energy sector which will provide strong potential for developing new business.

Remuneration will be commensurate with your skills and experience. As a small company, our success is closely linked to your personal performance, and as such we will look to reward and retain high performing staff. For our very highest performing staff Partnership in the firm may also be offered.

## THE INDIVIDUAL

The successful applicant must hold a degree in mechanical or structural engineering, with 10+ years of experience in the offshore engineering sector, the majority of which spent in the offshore renewables industry. Experience in a consulting environment is also preferred.

Knowledge of geotechnics, offshore installation, structures, and dynamics of offshore wind turbine foundation is also highly desirable, as is experience working with certification agencies such as DNV-GL, Lloyds Register and Bureau Veritas etc.

You must also be a strong communicator (both written and in meetings/presentations) and work well in a team.
